Personality Assessment Inventory Populations & Use 18+ years old Native English speaker 4th grade or above reading level Screening for psychopathology Treatment planning Diagnosis What the hell is a T-score? A means of converting different raw scores to comparable, easily interpreted scores Mean = 50, SD = +10 84% will have a score below 60, 98% below 70

Personality Assessment Inventory - Caleb Lack
Personality Assessment Inventory, developed by Leslie Morey, is a self-report 344-item personality test that assesses a respondent's personality and psychopathology. Each item is a statement about the respondent that the respondent rates with a 4-point scale. It is used in various contexts, including psychotherapy, crisis/evaluation, forensic, personnel selection, pain/medical, and child custody assessment. The test construction strategy for the PAI was primarily deductive and rational. It shows

Personality Assessment Inventory - Wikipedia
A quick personality screener, the PAS is derived from the full-length Personality Assessment Inventory™ (PAI®) and is designed for use as a triage instrument in health care and mental health settings, corporate EAPs, and college health services.

PAI® (Personality Assessment Inventory)
Description of Measure. The Personality Assessment Inventory (PAI) is an inventory of adult personality designed to provide information on critical clinical variables. The full PAI contains 344 items which comprise 22 non-overlapping scales. It is designed to be used with individuals from age 18 to adult.

Personality Assessment Inventory (PAI) - Subject Follow-up
The Personality Assessment Inventory (PAI) provides information relevant for clinical diagnosis, treatment planning and screening for psychopathology. The PAI covers constructs most relevant to a broad-based assessment of mental disorders. It is comprised of 344 items and requires 50-60 minutes to administer.

Personality Assessment Inventory | SIGMA Assessment Systems
